

MMIC-LR Lateral Wireless microphone receiver stand

Made in Europe

1) Installation with MV adapter:

Designed for perfect fit between Vplate and Camera head

Main features:

- Universal wireless accessory stand, allows installation on left and/or right side of the battery
- Does not obstruct with the battery which can be easily be removed and replaced without removing the stands
- Adjustable mic support: Can host a variety of devices thanks to its elastic and secure belt (not shown) and the adjustable base
- An additional mic stand can be installed on the opposite side
- Can be installed both on V-Mount enabled cameras (using MV2MV adapter) and on other cameras (using MV V-mount adapter)

2) Installation with MV2MV adapter:

Can be assembled with MV2MV adapter to create a unique and independent mic support with additional Power Tap connector
